Who should attend:

Wastewater utility staff, public works employees, wastewater plant operators, private sewer cleaning personnel, supervisors, managers and operators in training.

Workshop Description:

This course presents an overview of the major components of a wastewater system: collections, treatment plant operations, plant functions and disposal of the solids. The course will discuss the critical role each of the major components play as a part of treating industrial and residential wastes. Public Wastewater Utilities and Wastewater Treatment Plants are essential to public and environmental health and safety for the communities they serve.

Benefits of Attending:

Students will gain a knowledge and understanding of all components of a wastewater system and why it is critical to have training staff to maintain them. Gain a clear understanding of the requirements that must be met by a wastewater utility and staff to operate them.

SCHEDULE

- ◆ ***The Makeup of Wastewater***
Discuss the various dischargers of wastewater and other contributing sources.

- ◆ ***Combined Sewers***
Discuss why we need them and where they can be used.

- ◆ ***Wastewater System Infrastructure***
Learn a description of each function of the Wastewater System.

- ◆ ***Wastewater Treatment and Collection System Infrastructure***
Review maintenance concepts, frequency schedules and the requirement to track the maintenance.

- ◆ ***Wastewater Treatment Plant***
Gain a basic understanding of the processes and make up of the treatment plant.
