WETRC Presents: Arithmetic for Operators of W/WW Systems

Who should attend:

Water/wastewater system employees preparing to take entry level certification exams; certified operators preparing to take exams for higher levels of certification; elected officials and commissioners of water/wastewater systems; regulatory personnel and others responsible for insuring water/wastewater system compliance.

Workshop Description:

This course is designed to develop skills with applying basic arithmetic concepts to everyday problems associated with water/wastewater system operations. By applying techniques and methods presented in this course water system operators will be able to solve everyday operation and maintenance problems insuring adequate quantity, pressure and quality of drinking water that will protect public health and wastewater operators will be able to solve common problems to insure wastewater plants operate in a manor to insure compliance with state rules and to insure protection of the environment.

Major Topics

- Basic operations of arithmetic
- Units of measure measurement used in operation of water/wastewater systems
- Conversion of units used in operation of water/wastewater systems
- Formulas and formula rearrangement
- Basic formula manipulation
- Solving water/wastewater system operation and maintenance arithmetic sample problems

Benefits of Attending

- Take the mystery out of converting word problems to basic operations of arithmetic
- Understand how to apply order of operations to solve arithmetic problems facing water/wastewater utilities
- Learn to apply given formulas to operation and maintenance problems
- Discover ways to estimate answers
- Up-to-date information on using ABC formulas and unit conversions tables
- Practice applying arithmetic to everyday problems taking place in the operation of water/wastewater systems
