Who should attend:

Water distribution operators, managers and other water utility personnel interested in building a through skill and knowledge base of water works management, operation, and maintenance. This workshop also provides an effective foundation for those preparing for exams for Water Distribution Manager—Levels OIT, I or II; or Water Distribution Specialist.

For information on Water Certification exams, please call the Department of Health in Olympia at (800) 525-2536.

Workshop description:

Updated texts and audio-visual aids build a foundation from which to manage, operate, and maintain large and small water systems. You will learn important water quality and public health information, practice identifying water system components, learn component purposes and function, and be briefed on applicable drinking water rules and regulations, certification and professional growth requirements. You will also pick up practical safety and health information vital to reducing injuries and avoiding costly and embarrassing enforcement actions. Students will get the latest information on water storage, pumps and controls, disinfection, pipes, valves, hydrants, meters and records.

Topics:

Day 1

- Laws, rules, and regulations
- Water quality and monitoring
- Water storage and reservoirs
- Math for operators

Day 2

- Disinfection and chemical feed
- Applied hydraulics
- Certification and professional growth
- Pumps and pumping
- Pipe characteristics, installation and repair

Day 3

- Meters
- Tapping and service connection valves
- Hydrant installation and operation
- Cross Connection Control

You will learn:

- Practical, proven techniques with which to effectively manage, operate, and maintain a water system.
- Essential skills and knowledge to prepare you for the Water Distribution Manager or Specialist certification exam
- A thorough understanding of the job of a water distribution system operator or manager
