Training Center**

What is WETRC?

Washington Environmental Training Center (WETRC) is a non-profit, self-supported training organization founded in 1974 under the direction of the Environmental Protection Agency. Located on the Green River College Campus, WETRC provides specialized training and continuing education for water and wastewater personnel as well as backflow assembly testers. Affordable training enables operators to maintain and upgrade their certification levels and meet the State of Washington's training requirements.

Quality Training

WETRC instructors are professionals in the water and wastewater field. They receive training and coaching at the college in effective teaching methods, and actively contribute to curriculum updates. WETRC instructors keep current through professional associations, hold required certifications and generally work full-time in industry positions related to those subjects in which they instruct.

Up-to-Date Information

WETRC is continually developing new workshops and updating existing workshops to meet the needs of the industry.

Visit our website at www.wetric.org for a current, complete list of WETRC classes.

WETRC Training Tailored to Fit Your Needs

1. Scheduled workshops

Classroom setting
